Initial Submission

Getting Started

Initial Submission Application, V12, 5 Nov 2024

About Cayuse IRB

Cayuse IRB is an interactive web application. As you answer questions, new sections relevant to the type of research being conducted may appear. You do not have to finish the application in one sitting. All information can be saved.

For more information about the IRB submission Process, IRB Tracking, and Cayuse IRB Tasks, please refer to the Cayuse IRB Support website or by clicking the orange question mark at the bottom right hand corner.

Getting Started

Throughout the submission, you may be required to provide the following information:

- Detailed Study Information
- Study Recruitment
- Data Storage Information
- Details on Reimbursement
- Details if a waiver of Informed Consent is requested

Other Important Information

- You cannot begin your study until a **formal approval letter** from the chair of the IRB has been received.
- The IRB meets as needed during the regular academic year. Please submit the application as soon as possible.

Guidelines

- Please go to the NUS-IRB website to download the relevant guidelines.
- Please note that guidelines are accessible to NUS researchers only.
- For non-NUS researchers, please contact irb@nus.edu.sg.

---

*required

Confirmation

✓ I have read the information above and I am ready to begin my submission.

Basic Information

Simplified Title

For use in recruitment documents, e.g. Participant Information Sheet & Consent Form, advertisements.

***Please leave blank if main protocol title will be used in study documents*.**

Second Simplified Title

Is there a second Simplified Title for this project?

- ✓ No
- Yes

Key Personnel

Please list the key personnel on this project.

Principal Investigator

*required

Please find the Principal Investigator in the people finder, below.

Name: Ruben Durante (RDURANTE)
Organization: ECONOMICS

Address: 21 Lower Kent Ridge Rd , ,
Phone: 65166666
Email: rdurante@nus.edu.sg

Principal Investigator's Alternate Email Address

Student Principal Investigator

Is the PI a student at NUS?

✓ No

Yes

Primary Contact

---

*required

Please find the Primary Contact in the people finder, below.

Name: Ren Jie Teh (RENJIE.T)
Organization: ECONOMICS
Address: 21 Lower Kent Ridge Rd , ,
Phone: 65166666
Email: renjie.t@nus.edu.sg

Primary Contact's Alternate Email Address

Co-Investigator(s)

Please find the Co-Investigator(s) in the people finder, below, if applicable.

More than one Co-Investigator may be selected. ***Please do not include collaborators if they are not co-investigators in this study.***

Co-Investigator(s)'s Alternate Email Address(es)

External Co-Investigator(s)

If applicable.

Please do not include collaborators if they are not co-investigators in this study.

Will there be external co-investigators on this study?

No

✓ Yes

External Co-investigator(s)' Details

Please provide their information below.

If there are more than 5 external Co-Is in this study, please use the List of PI and Co-I Form here and attach the document below.

✓ Add Co-Investigator

*required

Full Name

Filipe Campante

*required

Title / Salutation

Professor

*required

Position

Bloomberg Distinguished Professor

*required

Add Co-Investigator

Add Co-Investigator

Please attach the List of PI and Co-I Form here, if applicable.

*required

Funding

Is this project funded?

✓ No

Yes

*required

External IRB(s)

Has the protocol for this project been submitted to or approved by other local/overseas IRBs?

- ✓ No
- Yes

Review and Study Classification

Social, behavioral, and education research (SBER) encompasses a range of methodologies and tackles questions that seek to improve our understanding of human behavior, attitudes, beliefs, and interactions as well as social and economic systems, organizations, and institutions.

Human Tissue Framework: Please refer here for more information and the HTF Self-Checklist for PI.

Human Biomedical Research: Please refer to the link to the Act for the definition and the HBR Self-Checklist for PI.

Review Classification

*required

Social, Behavioral, Educational Research (SBER) Category

Does this project fall under the Social, Behavioral, Educational Research (SBER) category?

- Yes
- ✓ No

*required

Review Not Required (RNR)

Is the PI seeking a formal determination for Review Not Required?

- ✓ Yes
- No

Please proceed to the Review Not Required section.

TYPE OF STUDY: Review Not Required

Review Not Required

Research proposing to use solely the following materials / data may be submitted via this Review Not Required form:

1. Human biological materials (excluding human tissues and human stem cells) and cell lines (including modifications), which are **commercially-available and anonymized (i.e. not individually-identifiable)**; **AND/OR**

2. **Non-individually identifiable** human biological materials (excluding human tissues and human stem cells)**; AND/OR**

3. **Non-individually identifiable** data (including **non-individually identifiable** health information)

Please read the NUS-IRB's Guidelines on Review Not Required Determination before submitting this form.

Please note that the final decision on whether the study can undergo a Review Not Required will be subject to the IRB's determination.

---

*required

PI's Declaration

I have read and confirmed that my research meets **both** criteria stated in the Review Not Required (RNR) guidelines as follows:

1. The data or human biological material (excluding human tissues) intended for the RNR Study must be obtained by the researcher without any intervention or interaction with an individual person (e.g., research subject), and such data or human biological material (excluding human tissues) must be used, studied, or analysed in the RNR Study only; **and**

2. The RNR Study should not obtain, use, study, analyse, or generate any identifiable information or identifiable human biological material (excluding human tissues), or enable any individual to be re-identified.

✓ Confirmed

*required

Please select the type(s) of material(s) / data used in this research study:

Human biological materials (excluding human tissues and human stem cells) and cell lines (including modifications), which are **commercially-available and anonymized (i.e. not individually-identifiable).**

Non-individually identifiable human biological materials (excluding human tissues and human stem cells).

✓ **Non-individually identifiable** data (including **non-individually identifiable** health information).

*required

Type(s) of non-individually identifiable data (including non-individually identifiable health information)

Please list the type(s) of data to be obtained for your research study.

For example:

1. *Lung cancer incidence rate in Singapore*
2. *Survey results from a research on climate change*

1. Survey results from a quiz administered by a prominent German newspaper Sueddeutsche Zeitung (SZ) that investigates the effect of being exposed to AI content on concerns towards misinformation, trust, and willingness to pay for news
2. Anonymized news consumption metrics provided by SZ for respondents who agreed to have their information merged with the survey. Measures include daily-level news consumption (number of pages, time spent), subscription decisions, type of news content consumed etc.

*required

Source(s) of Data

Please state the source(s) of the non-individually identifiable data (including non-individually identifiable health information) for your research study. Please ensure the order of information corresponds with the order of data listed above.

For example:

1. *Publicly-available lung cancer incidence rate in Singapore obtained from MOH website*
2. *Survey results from a research on climate change from Prof XXX, PI of research study (IRB reference number: ###)*

The data concerning both items (1) and (2) above are obtained through a collaboration with co-author Dr Felix Hagemeister that works in the Data Science team in Sueddeutsche Zeitung.

*required

Supporting Documents from Data Source(s)

Please attach relevant supporting documents from the data source(s), including but not limited to the data collection form(s)/template(s) stating the data fields/variables to be obtained, ethics approval letter(s), consent form(s) used, and/or letter(s) of willingness or Data Sharing Agreement(s) between the source(s) and NUS PI, if applicable.

PI's Declaration

As the Principal Investigator of this research study, I hereby declare that:

*required

No human stem cells or stem cell lines will be used this research study.

✓ True

False

*required

I am not conducting any prohibited or restricted research as defined in the Third and Fourth Schedules of the Human Biomedical Research Act (2015).

✓ True

False

*required

I am not using any human tissues (whether individually-identifiable or not).

✓ True

False

*required

I am not using any individually-identifiable human biological materials and/or data (including health information) in this study.

✓ True

False

*required

I am not creating a tissue bank or conducting any tissue banking activity with the cells / biological materials as defined in section 2 of the Human Biomedical Research Act (2015).

✓ True

False

*required

I am not injecting any of the biological materials (listed above) into any animal in this study.

✓ True

False

*required

All relevant approvals, consents and agreements (where applicable) are / will be in place for the use of the non-individually identifiable human biological materials (excluding human tissues and human stem cells) and/or non-individually identifiable data (including non-individually identifiable health information), before commencing my research study.

True

False

✓ N/A (not using such materials in this research study)

*required

The human biological materials listed above are considered substantially manipulated and/or are not human tissues as defined in section 2 and the First Schedule of the Human Biomedical Research Act (2015).

True

False

✓ N/A (not using such materials in this research study)

Please read:

1. Confirm all sections are complete with a **white check** (tick) next to the section name in the left column.
2. Attach any and all relevant documents in the **Attachments** section.
3. Leave any comments relevant to this study in the **Comments** section. (Optional)
4. Click **Complete Submission** at the bottom of the left column.
5. Please check that the **"Organisation" unit** in the **Study Details page** is correct **BEFORE** the PI certifies the application.
